

Deadline: April 10-13, 2023 (respective classes)

Assignment 5:

Design a web application that posts blogs using *Spring framework or a combination of Node JS and Spring*. The application will store a list of blogs by the authors. A user can have any one of the 3 different roles-admin, creator, and viewer. A user will be eligible to do the following

- View and read the blogs available at the server
- View detailed information about a particular blog such as, the avg. time to read, the creator of the blog, the date last updated, etc.
- Only a creator can edit a blog.
- Only an admin can remove any blog.

Give your comment on how you have implemented Spring security and which security threats are prevented through your incorporated security measures for the developed application.
